

SW 261 Treatment Summary Assignment Glenn Thomas LSCW

Complete treatment summary of student's work with the child. Use Critical thinking and self-reflection to analyze own participation in the sessions and its outcome.

Discuss the importance of diagnosing and treating children in the context of their families and communities.

Reflect upon how training affected their practice with the case.

Approximately 8 pages.

Please use the headings in **bold** below and amount of writing for each section to organize your paper.

1. 1 page: **Treatment Overview** What you learned by doing the 3 papers. Include some of the following content of SW clinical practice: assessment, diagnosis, treatment plan, referrals, interventions, diversity, legal, and ethical
2. 3 pages : **Treatment Summary** (Include if you are interning in a setting where you can treat).
 - a. 1 page: **Treatment Focus** - your treatment goals for the therapy - what did you expect to accomplish by the end of treatment e.g. reduce disruptive behaviors, reduce PTSD symptoms, increase parents hierarchy.
 - b. 1 page **Method of treatment**, (most of page should be writing what you did in the sessions) e.g. What you said and did in the session. What were your main interventions in the treatment such as teaching feeling states to a child while the parent views.
 - c. 1 page **Termination and Outcome** : Did you get the outcome you expected. Did the expected treatment focus occur.
3. 1 page : Discuss the importance of **Diagnosing and Treating Children in the Context of their Families and Communities**.
4. 1 page : What **Training** would you take for this case, and how would you choose it?
5. **Reflection of SW 261**- Use the last page to self reflect and analyze your participation in the class.
 - a. 1 page : What did you learn?
 - b. 1 page : What do you need to know when you encounter a child with symptoms (Be able to assess, diagnos, and treat with both a multisystems perspective and the DSM IV)

Good Luck

Glenn
